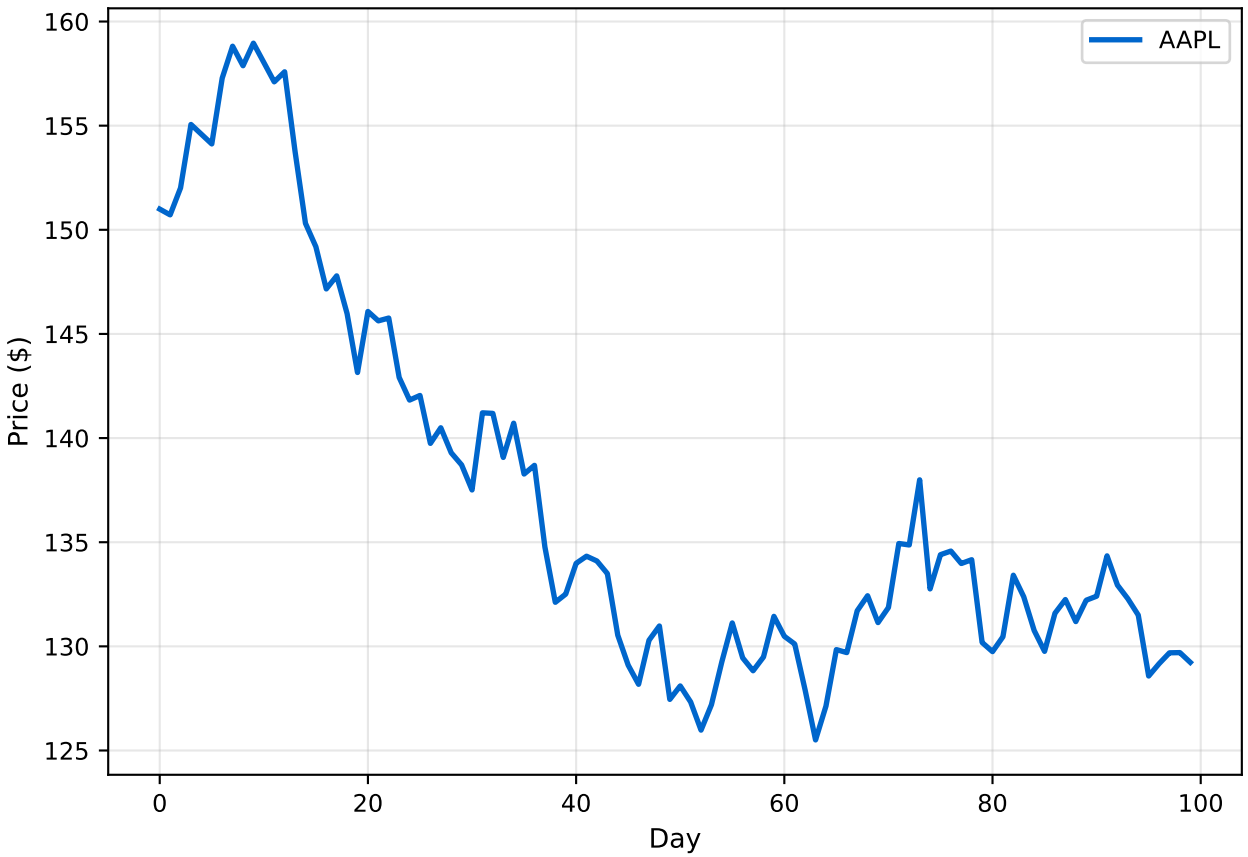
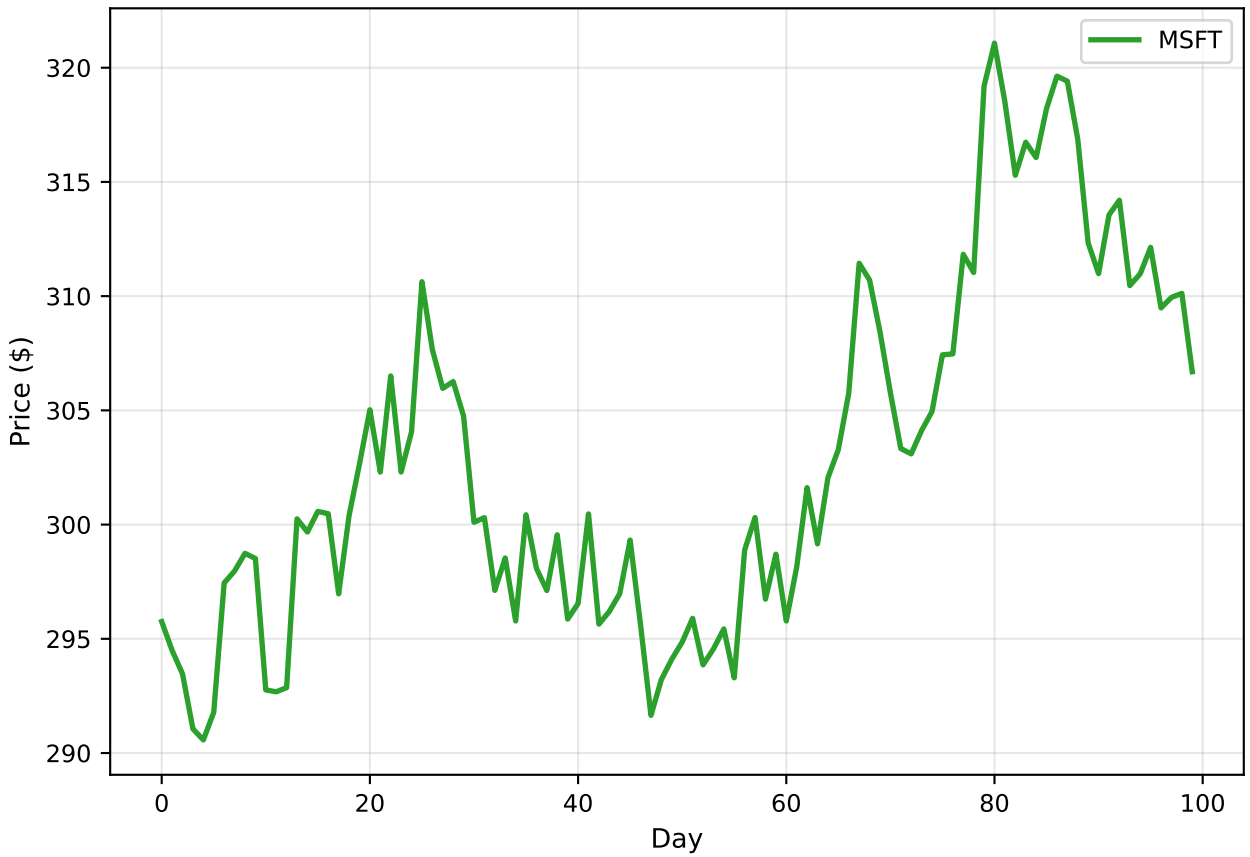
Shared Axes: sharex and sharey Parameters

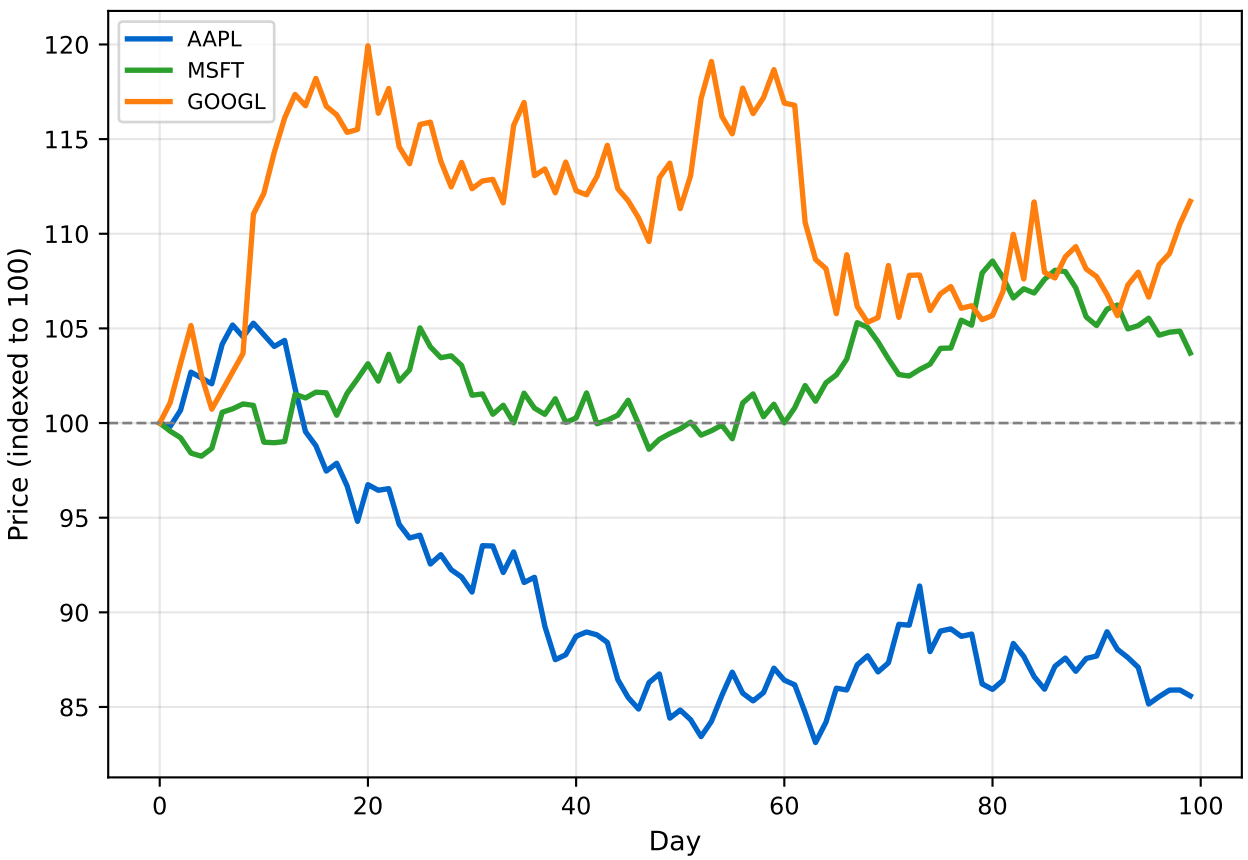
No Shared Axes (default)



Different Y Scale



Normalized Prices (Same Scale)



Shared Axes Syntax Reference

```
Shared Axes Syntax:

# Share X axis between columns
fig, axes = plt.subplots(2, 2, sharex='col')

# Share Y axis between rows
fig, axes = plt.subplots(2, 2, sharey='row')

# Share both axes across all subplots
fig, axes = plt.subplots(2, 2, sharex=True, sharey=True)

Benefits:
- Consistent scale for comparison
- Cleaner appearance (fewer tick labels)
- Easy to spot relative differences
```
