

Datetime Parsing in pandas

String Input		Format Code		Description
"2024-01-15"	➔	%Y-%m-%d		ISO format (default)
"01/15/2024"	➔	%m/%d/%Y		US format
"15-Jan-2024"	➔	%d-%b-%Y		Day-Month-Year
"Jan 15, 2024"	➔	%b %d, %Y		Written format
Parsing Methods				
pd.to_datetime('2024-01-15')				Auto-detect format
pd.to_datetime(df['date'], format='%Y-%m-%d')				Specify format (faster)
pd.read_csv('file.csv', parse_dates=['date'])				Parse during import
Common Format Codes: %Y=year(4) %y=year(2) %m=month %d=day %H=hour %M=min %b=month(abbr)
