

Lesson 26: Decision Trees

Data Science with Python – BSc Course

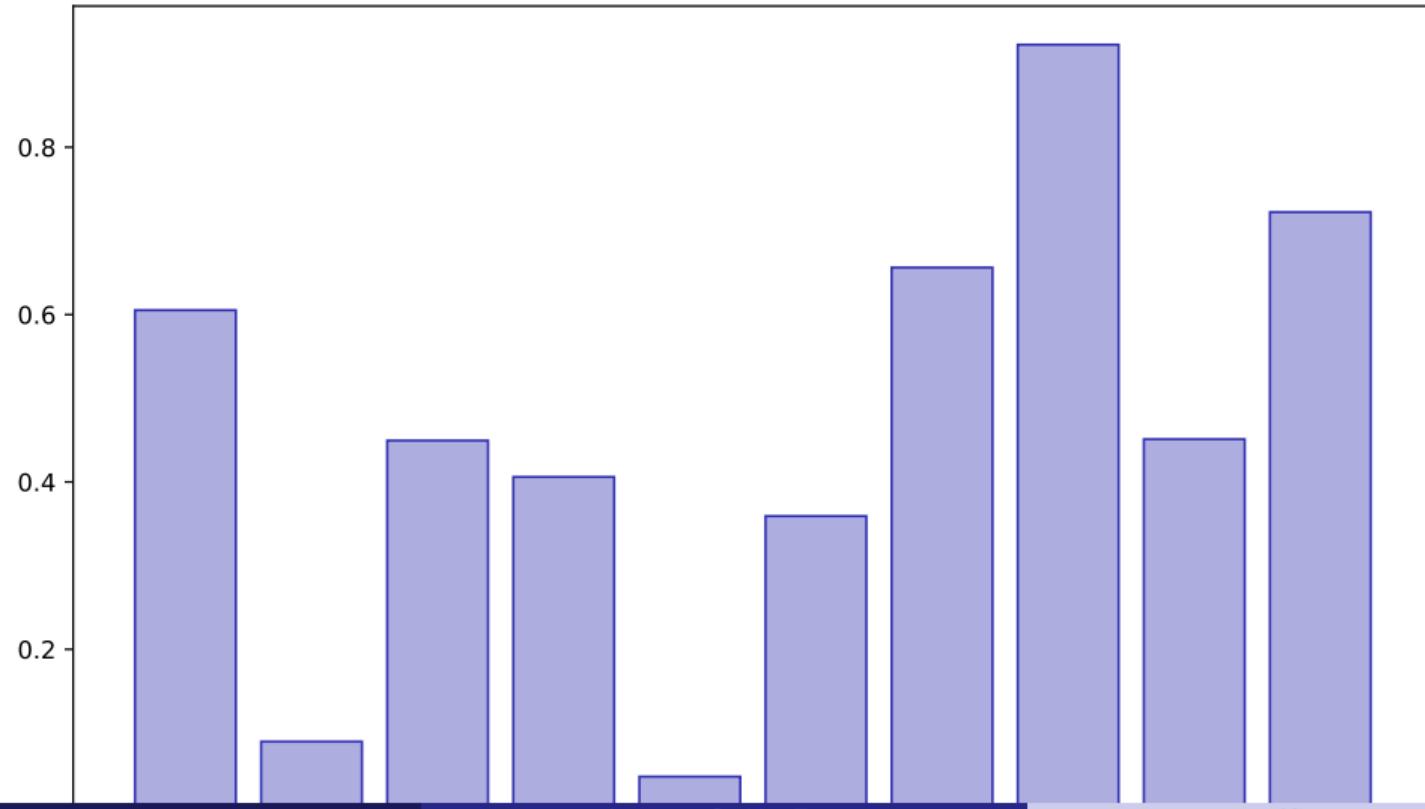

45 Minutes

After this lesson, you will be able to:

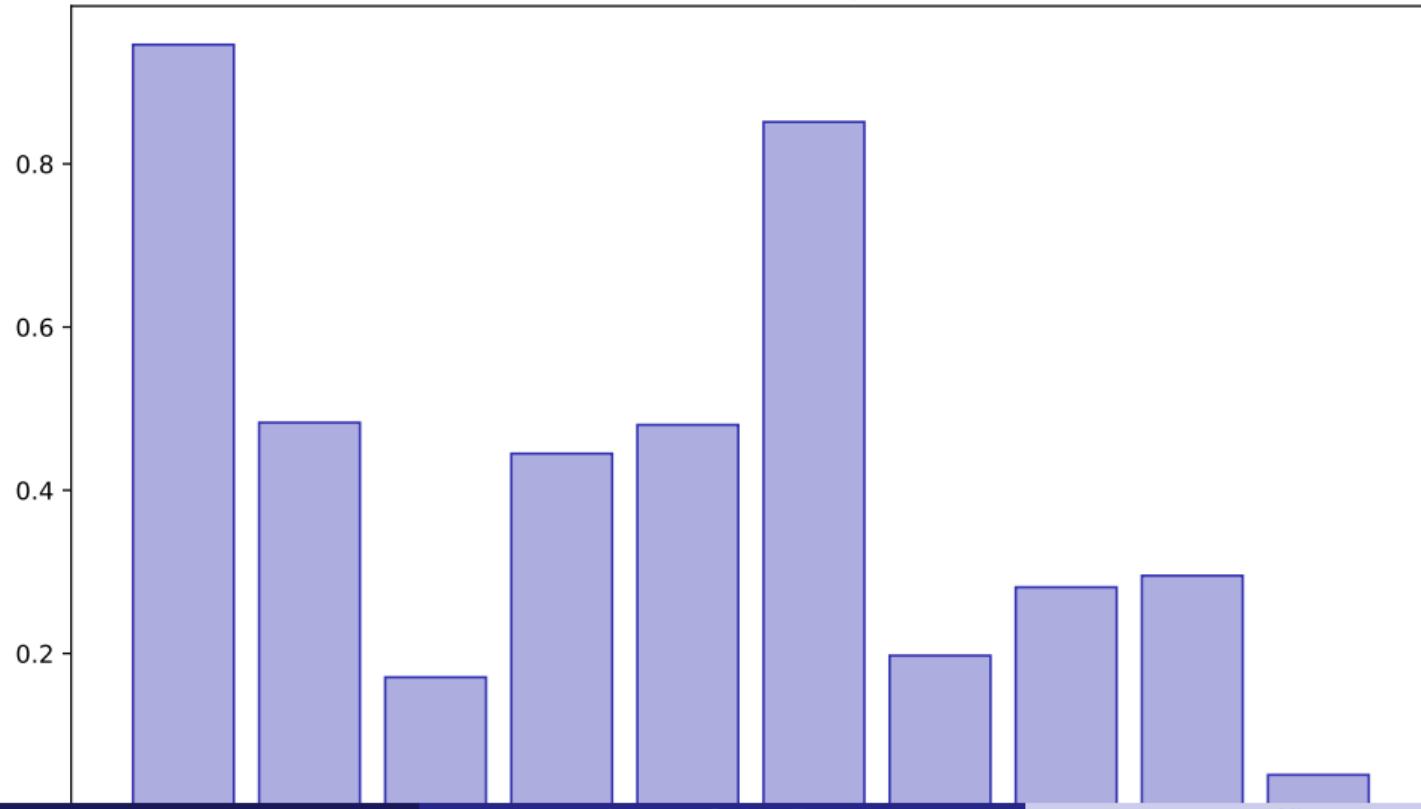

- Build decision tree classifiers
- Understand splitting criteria
- Apply Random Forest ensemble
- Interpret feature importance

Building towards your final project

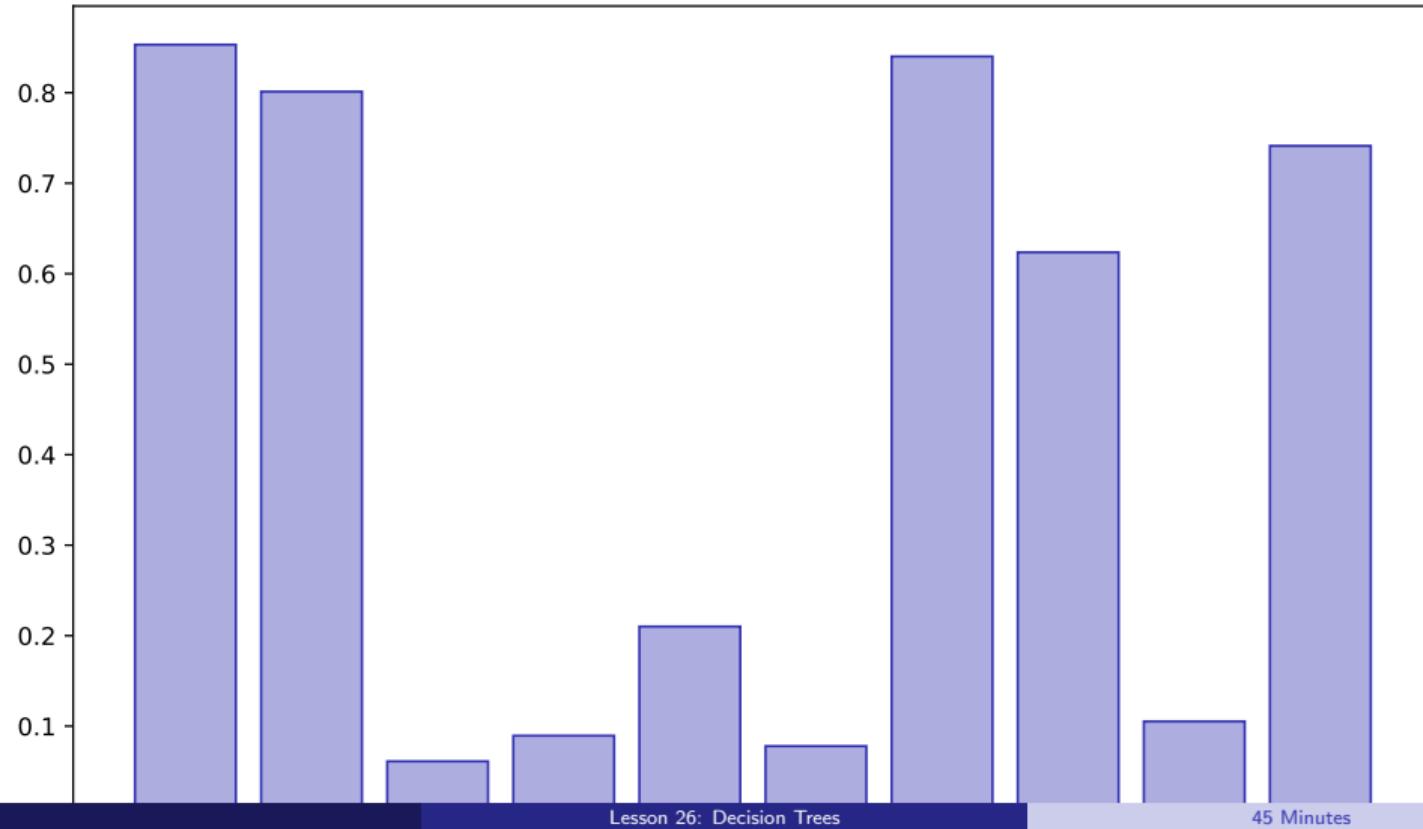

Tree Structure

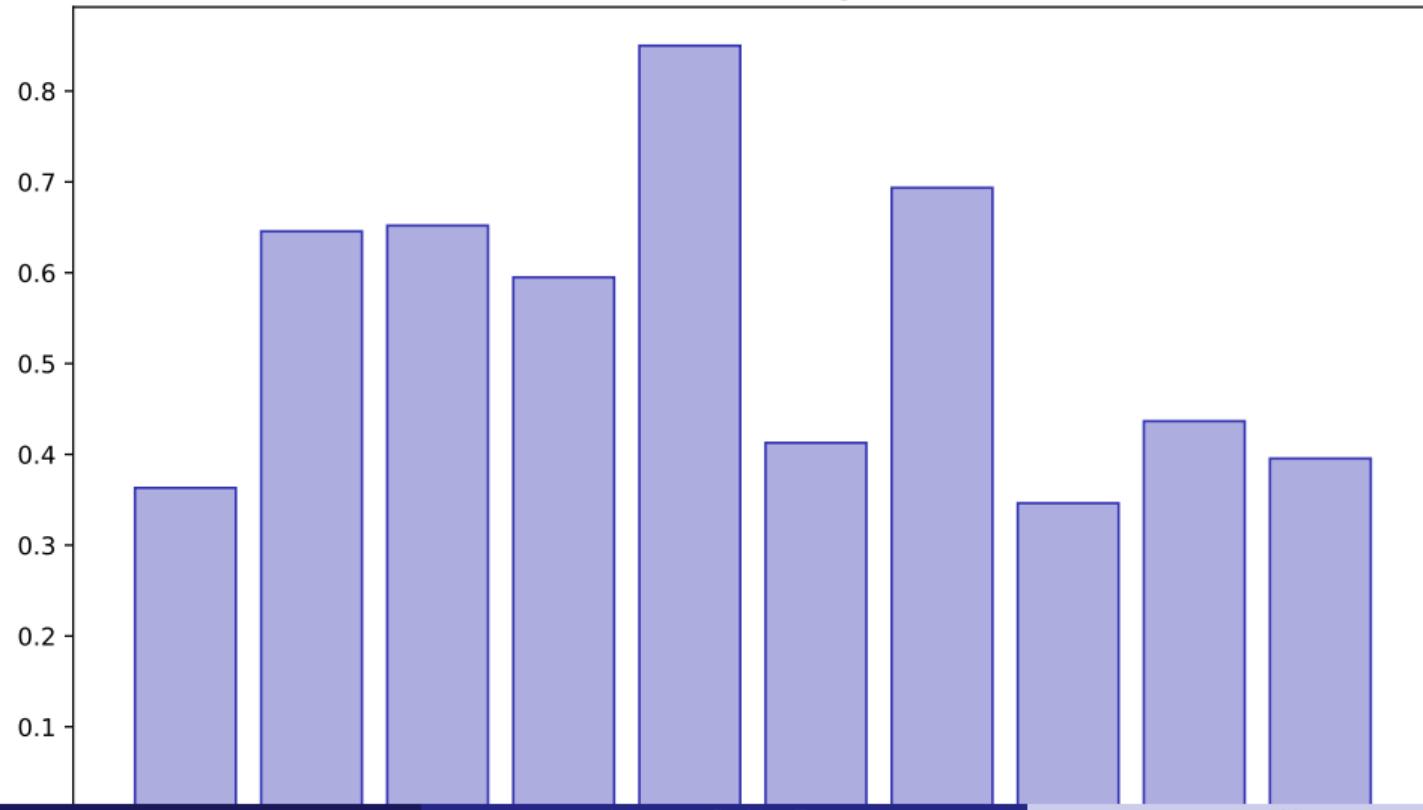

Gini Entropy

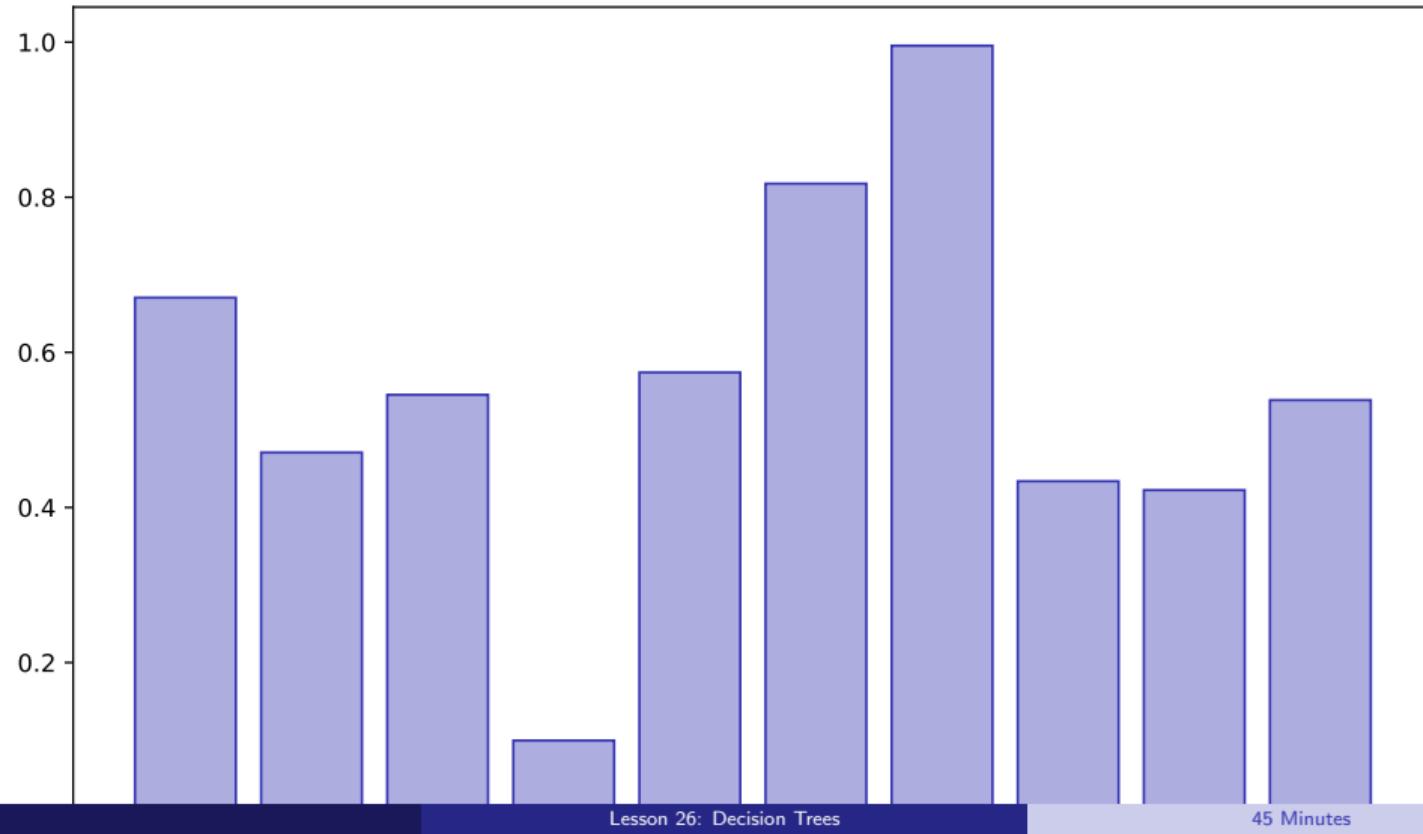

Tree Sklearn

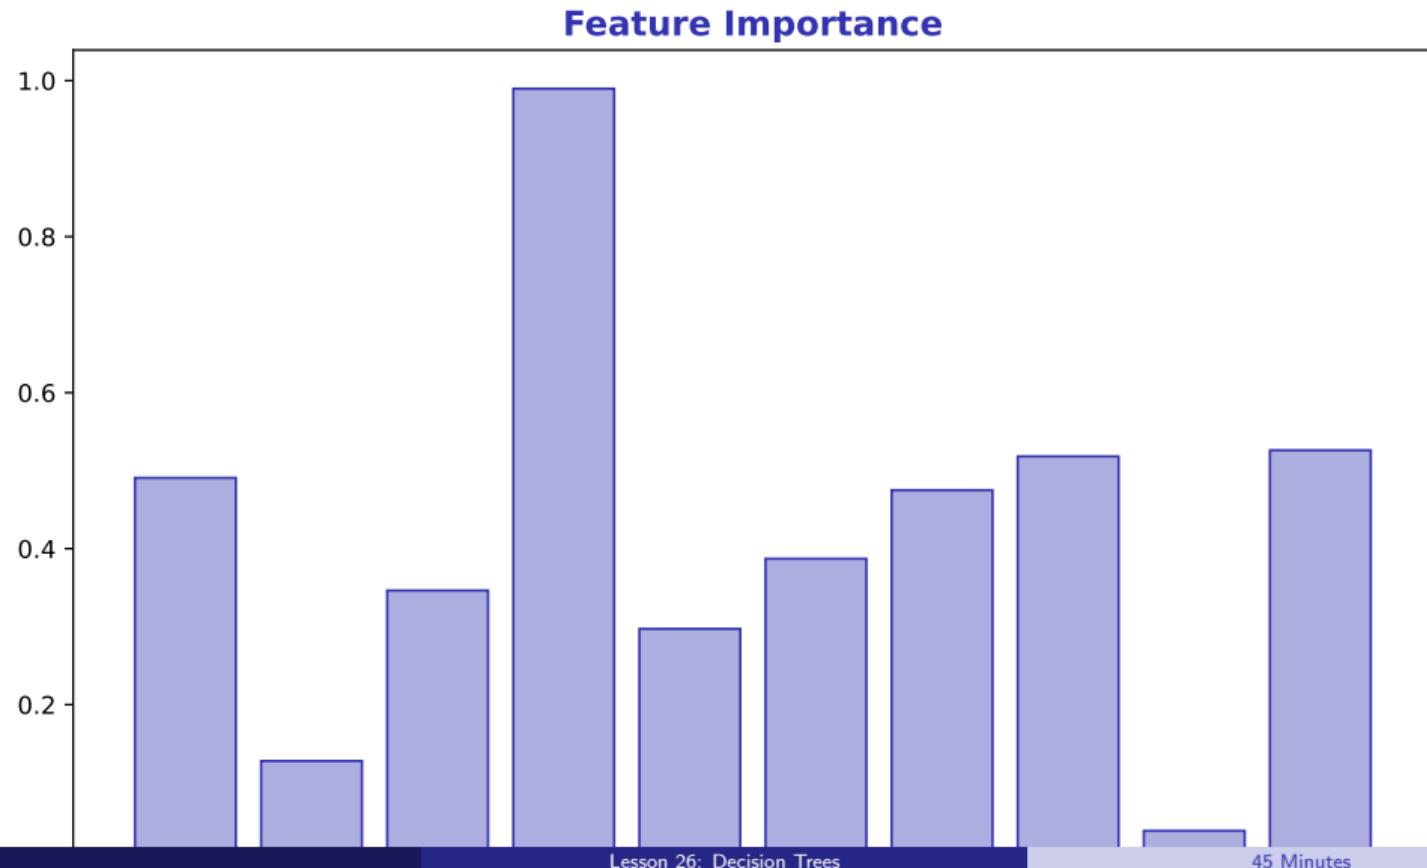

Overfitting

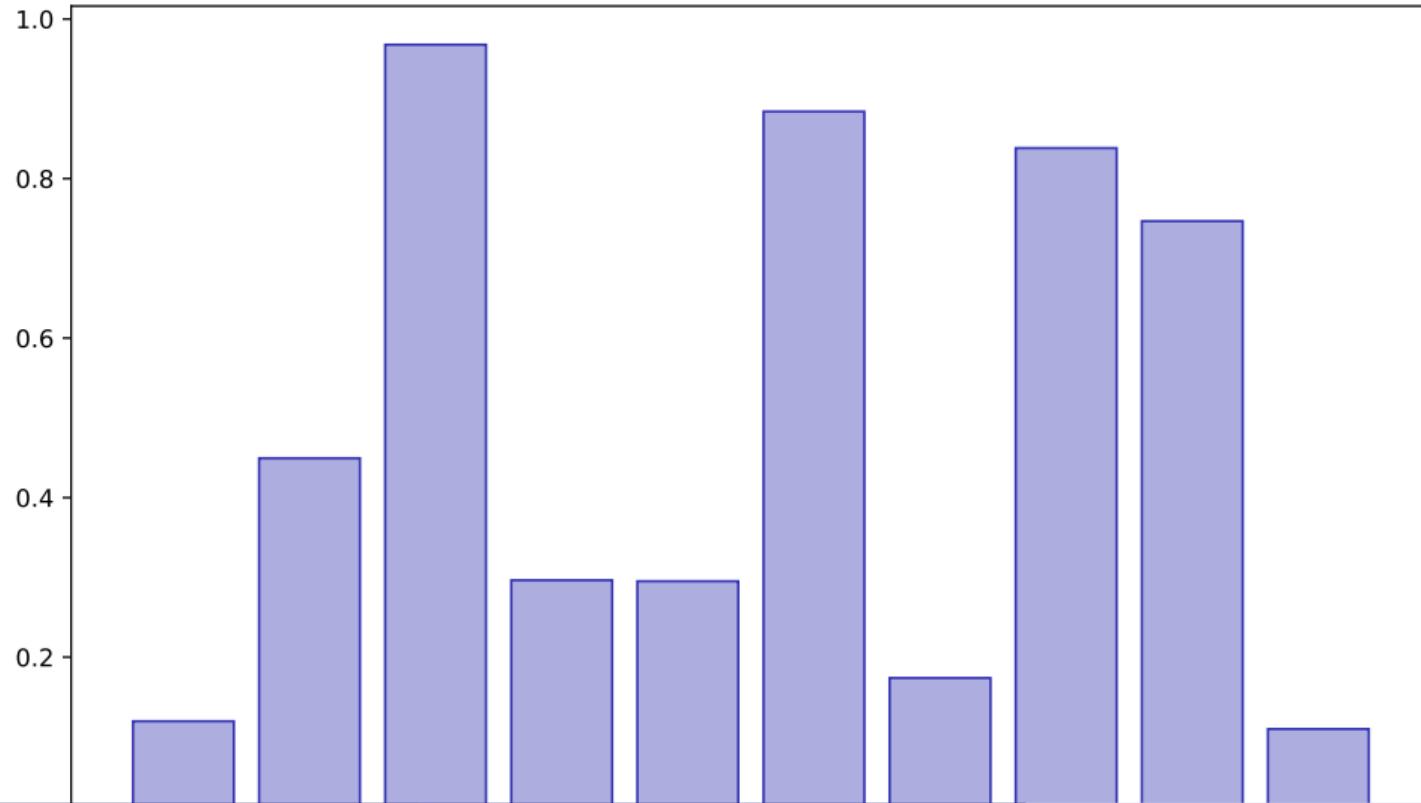

Random Forest

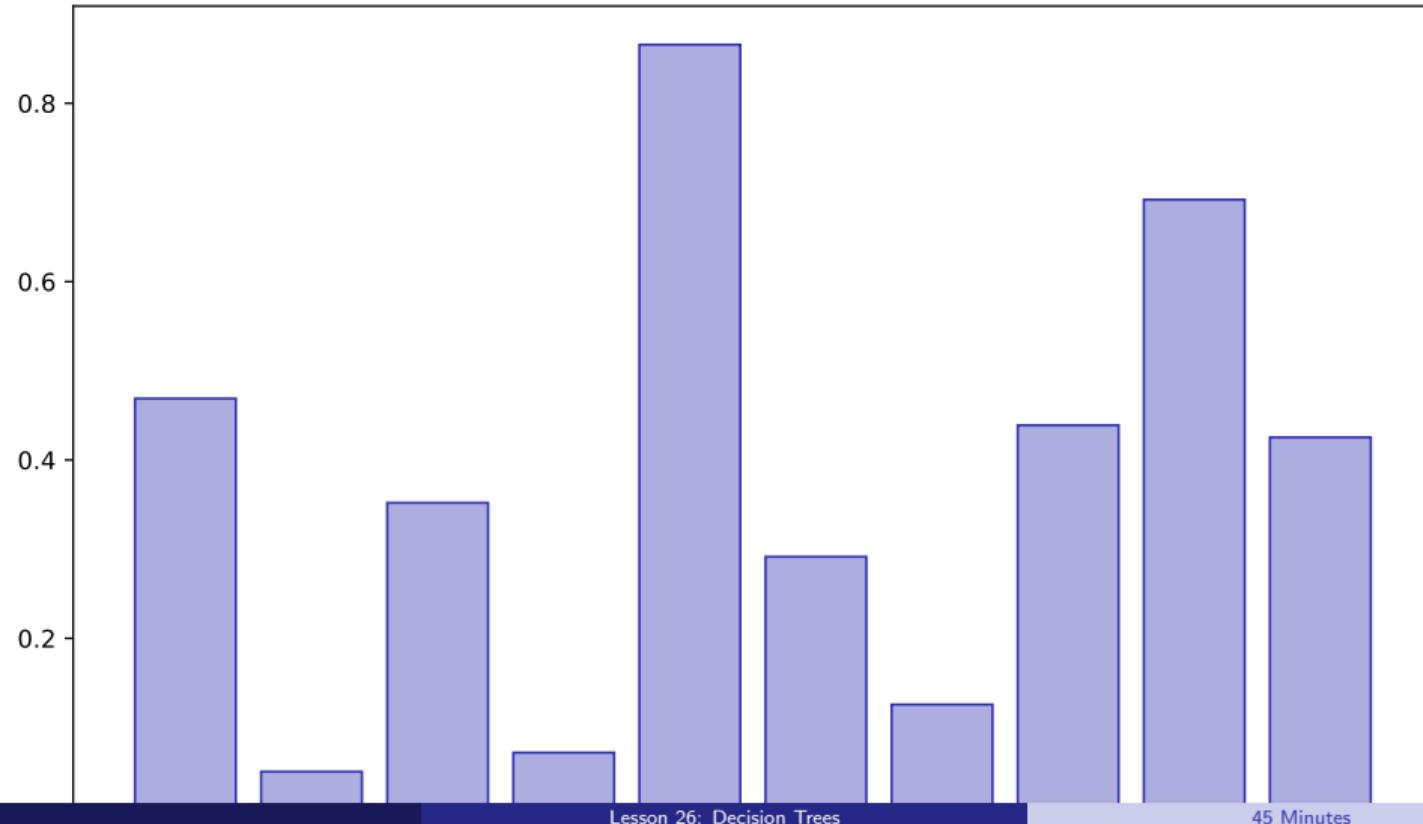

Tree Visualization

Finance Trees

Lesson Summary

Key Takeaways:

- Build decision tree classifiers
- Understand splitting criteria
- Apply Random Forest ensemble
- Interpret feature importance

Apply these skills in your final project
