Chained Filtering with query()

Traditional

```
df[(df["AAPL"] > 185) &

    (df["Volume"] > 1e6)]
```

query() Method

```
df.query("AAPL > 185 and

        Volume > 1e6")
```

query() is more readable for complex filters

Membership: isin()

```
df[df["Symbol"].isin(["AAPL", "MSFT", "GOOGL"])]
```
